

CLAIMS

The invention claimed is:

1. A baseball bat grip, comprising:
at least one protrusion thereon, said protrusion serving to maintain a user's
at least one hand in position during the course of a swing of the bat.
2. A baseball grip, comprising:
a pair of protrusions each adapted to be received by a V-shaped portion on
one of the user's right or left hands;
said protrusions acting in concert to prevent any transfers slippage of
user's grip during a typical swing.
